

Association professionnelle  
des chargés de sécurité  
transfusionnelle du Québec

L'association professionnelle  
des chargés de sécurité  
transfusionnelle du Québec  
(APCSTQ)

presents its 14th annual  
Transfusion Safety Week  
June 13 – 19, 2022

Transfusion safety officers ensure compliance with best practices  
surrounding the blood transfusion.

Whether during the preparation of the donation, the laboratory tests or the  
transfusion in a hospital centre, the medical laboratory technologists, nurses,  
respiratory therapists, perfusionists and other health professionals who  
practice transfusion medicine are trained to offer a service meeting the  
highest safety standards.

Under the theme "Check before transfusing, a matter of security", the  
APCSTQ invites you to view conferences directly on the website :

<https://apcstq.com/activites/>

\* please note that the conferences are offered in french.

We thank you for your collaboration!

Isabelle Bournival, T.M. clinical transfusion safety officer, region 11

Marie-Claude Denommé, T.M. clinical transfusion safety officer, region 04

Marianne Lamarre, T. M. technical transfusion safety officer, region 04
